

FRD - Retail Sales & Customer Order Management System

Module 1: Recovery Management

FR ID	Requirement
FR-001	System shall check for unfinished transactions during login.
FR-002	System shall display pending transactions available for recovery.
FR-003	System shall allow users to recover an unfinished transaction.
FR-004	System shall allow users to discard an unfinished transaction.

Module 2: User Authentication

FR ID	Requirement
FR-005	System shall authenticate users using valid credentials.
FR-006	System shall display an error message for invalid credentials.
FR-007	System shall redirect authenticated users to the POS dashboard.

Module 3: Store Readiness Validation

FR ID	Requirement
FR-008	System shall verify store readiness before transaction initiation.
FR-009	System shall prevent transaction creation if store validation fails.
FR-010	System shall display appropriate error messages when store services are unavailable.

Module 4: Customer Management

FR ID	Requirement
FR-011	System shall search existing customers using customer details.
FR-012	System shall display matching customer records.
FR-013	System shall allow creation of new customer records.
FR-014	System shall support guest checkout functionality.
FR-015	System shall allow customer details to be updated during checkout.

Module 5: Product Management

FR ID	Requirement
FR-016	System shall search products using product name.
FR-017	System shall search products using SKU.
FR-018	System shall support barcode scanning.
FR-019	System shall display product information.
FR-020	System shall add selected products to the basket.

Module 6: Gift Card Management

FR ID	Requirement
FR-021	System shall validate gift card numbers.
FR-022	System shall retrieve gift card balance information.
FR-023	System shall allow users to specify gift card value.
FR-024	System shall add validated gift cards to the basket.

Module 7: Shopping Basket

FR ID	Requirement
FR-025	System shall update basket totals after every modification.
FR-026	System shall update basket when quantities change.
FR-027	System shall update basket when products are removed.
FR-028	System shall update basket when discounts are applied.
FR-029	System shall update basket when customer information changes.
FR-030	System shall update basket when loyalty vouchers are redeemed.
FR-031	System shall display basket subtotal, discount amount, and final total.

Module 8: Discount Management

FR ID	Requirement
FR-032	System shall display available discounts.
FR-033	System shall support item-level discounts.
FR-034	System shall support basket-level discounts.
FR-035	System shall recalculate basket totals after discount application.

Module 9: Loyalty Voucher Management

FR ID	Requirement
FR-036	System shall validate loyalty vouchers.
FR-037	System shall support voucher scanning.
FR-038	System shall apply voucher value to the basket.
FR-039	System shall reject expired or invalid vouchers.

Module 10: Staff Discount Management

FR ID	Requirement
FR-040	System shall validate staff cards.
FR-041	System shall retrieve staff discount percentages.
FR-042	System shall apply staff discounts to eligible transactions.

Module 11: Payment Processing

FR ID	Requirement
FR-043	System shall support card payments.
FR-044	System shall support cash payments.
FR-045	System shall support gift card payments.
FR-046	System shall support credit note payments.
FR-047	System shall support other tender types.
FR-048	System shall validate successful payment before sale creation.

Module 12: Gift Receipt Management

FR ID	Requirement
FR-049	System shall check the GiftReceipt configuration setting.
FR-050	System shall prompt users for gift receipt generation when enabled.
FR-051	System shall capture gift receipt selection.
FR-052	System shall pass gift receipt flag to the Sale API.

Module 13: Sale Processing

FR ID	Requirement
FR-053	System shall create a sale record after successful payment.
FR-054	System shall create customer orders.
FR-055	System shall generate a unique transaction number.
FR-056	System shall generate transaction receipts.

Module 14: Sale Confirmation

FR ID	Requirement
FR-057	System shall display sale confirmation.
FR-058	System shall trigger Sale Confirmation processing.
FR-059	System shall mark the transaction as completed.
FR-060	System shall send confirmation details to downstream systems.
